

Andrés Ferraris

Andrés Ferraris is a Managing Partner at EconLogic. He specializes in valuation, damages, and regulatory analysis. He provides law firms, corporations, and government clients with rigorous, yet simple solutions to complex economic and financial problems.

He has provided consulting and advisory services mainly in the context of the assessment of damages in arbitration & litigation; the valuation of businesses & assets for investment processes, M&A, and debt issuance; the analysis of regulatory frameworks; competition & antitrust; and utilities' tariffs setting processes and reviews.

During his 17 years of professional experience, he has provided expert testimony and participated in the advice to companies and sovereign states in relation to regulated and non-regulated activities in Latin America and Europe in several industries, including public utility services, oil & gas production and transportation, power generation and transportation, field services in the upstream of oil & gas, infrastructure, production of hot-briquetted iron, manufacture of steel and seamless pipes, cement production, stock market, banking and finance, insurance, transportation, fixed and mobile telecommunications, satellite services, real estate, food and beverage production and marketing, testing laboratories, waste management & treatment, and water & sewerage services.

During 2019 he worked as a consultant at Energy Consilium. Between December 2015 and December 2018, he served first as National Director of Tariff Policy and then as National Director of the Economics of Hydrocarbons in the Ministry of Energy and Mining in Argentina. He has been directly involved in the normalization of the energy sector in Argentina between 2016-2018. He previously worked as a Senior Economist at Compass Lexecon and as a Senior Associate at LECG.

He holds a BA degree in Economics from the University of San Andrés (UdeSA, Argentina) and an EMBA -Magna Cum Laude- from the IAE Business School (Universidad Austral, Argentina); he also did the MA in Economics at the University of San Andrés where he obtained a scholarship. He has taught economics and finance at UdeSA and at the University of Buenos Aires.
